Full Stack Developer

Passionate and versatile Full-Stack Developer, specialized in building robust and high-performance web solutions. I leverage strong skills in frontend (Next.js, Angular) and backend (Java, Go) to design and manage the entire application lifecycle. Proficient in REST APIs, real-time features (WebSockets), authentication, and performance optimization. Proactive and solution-oriented, I focus on solving complex problems and collaborating effectively within teams to deliver reliable solutions that ensure a high-quality user experience.

Technical Skills

Front-End: HTML5, SCSS, JavaScript (ES6+), Next.js, Angular, Tailwind.

Back-End: Node.js, Golang, Java (Spring Boot, Spring Eureka, Spring Gateway), Apache Kafka.

Databases: PostgreSQL, MongoDB, SqLite.

APIs & Services: RESTful APIs, WebSockets.

DevOps & Cloud: Unix, Shell Scripting, Docker.

Other Tools: Postman, VirtualBox, Testing, Pandas, Git, GitHub.

Projets

ECHO & SCRIPT (Social Blogging Platform)

- Development of a social blogging platform integrating full **CRUD operations** (posts, comments, profiles, categories) along with **social interactions** (likes, following, search).
- Implementation of **real-time notifications** and messaging using **WebSockets**, along with advanced security (**JWT**, **OAuth2**, roles) and an **admin dashboard**.

Outils : Angular, TypeScript, SCSS, Spring Boot 3.5, Java 17, PostgreSQL, Flyway, WebSocket/STOMP, JWT, OAuth2, Hibernate/JPA, JUnit.

Bomberman-DOM (Web Game Project)

- Development of a multiplayer game using **Vanilla JavaScript**, with full real-time management via WebSockets and **advanced mechanics** (bombs, power-ups, collisions).
- Architecture based on my **mini-framework** (**Virtual DOM**, component **state management**) with synchronized game state for 2 to 4 players and **integrated chat**.

Outils: JavaScript (vanilla), HTML/CSS, Node.js, Socket.io, Mini-Framework.

Ideathon (Web Platform for Ideation and Collaborative Challenges)

- Ideathoon is a web platform for ideation and collaborative challenges, designed to efficiently manage idea competitions. It facilitates idea submission, collaborative enrichment, and evaluation, making it ideal for hackathons.
- I was responsible for the **backend**, developing a **REST API** to handle **authentication**, **session security**, idea management, contest workflows, and data storage.

Outils: Golang, SQLite, Hashing, Next.js, Tailwind.

Local-Server (HTTP/1.1 Web Server in Java)

- Development of a custom **HTTP/1.1** server in Java using a **single thread** with asynchronous socket handling and **non-blocking architecture**.
- Implementation of **routing**, error pages, uploads, **CGI scripts**, performance optimization, and load testing: **100% uptime**, 13,333 transactions/sec, **0 failures with 150 concurrent users**.

Outils : Java 17, Java NIO, CGI.

Education

- Zone01 Oujda — Janv 2024 – Janv 2026
- Ecole Supérieur d'ingénierie Informatique Et de Multimédia — Oct 2020 – Juin 2023
- High School Diploma in Mathematical Sciences — Juin 2019

Professional Experience

Full-Stack Developer Intern

Yazaki Maroc — Mar 2026 – Avr 2026

- Develop a web application for equipment order management, enabling the creation, tracking, and handling of orders through **configurable multi-step workflows**.
- I developed this application using **Angular / Spring Boot,** with **JWT** authentication, **role-based access control**, and a **PostgreSQL** database.

Competitive Experience

- **Active member** of the Competitive Programming Club 01 at Zone 01 Oujda.
- I have solved **over 500 exercises** on LeetCode to deepen my programming skills.
- **Ranked 4th** in the MEET the Lead (72 h) hackathon, demonstrating innovation and **rapid execution**.
- I participate in **collaborative** projects, hackathons, and workshops to develop my skills and connect with other enthusiasts.

Langues

English :Professional Proficiency

French : Niveau intermédiaire
